ISPAD 2012

October 10th–13th, 2012
Istanbul, Turkey

Global challenges for Integrated
Pediatric Diabetes Care

<http://2012.ispad.org>

Welcome Message

We are delighted to welcome you to the 38th Annual Meeting of ISPAD, October 10-13, 2012, in Istanbul, Turkey. Extending into both Europe and Asia, Istanbul is the only city in the world which is situated on two continents, demonstrating a true melting pot of cultures and civilizations both eastern and western.

Şükran Darcan, MD

Our aim is to build an ambitious and unique program alongside the Local Organizing Committee focusing on basic science and clinical research where state of the art views of the recent advances in pediatric diabetes will be covered. We will bring together Scientific and clinical leaders as well as young scientists from all over the world in order to lead interactive debates.

Damla Gökşen, MD

Beyond scientific activities a visit in Istanbul will give you the opportunity to be able to feel the historical continuity from the ancient times to the modern age and be amazed by the lights, flavors and places. We will also have the time to develop social and interpersonal relationships and friendships.

We look forward to welcoming and hosting you in Istanbul and wish all of you an unforgettable conference and enjoyable stay in Istanbul.

Şükran Darcan, MD

Damla Gökşen, MD

Istanbul

The splendid city of Istanbul has many unique and fascinating features.

It is the only city in the world reaching across two continents, with its old city in Europe and modern Istanbul situated in Asia, separated by the Bosphorus Strait. The city has also been the capital during two successive empires, Christian Byzantine and Islamic Ottoman, and the legacy from both is visible in the modern city today. It is bounded on the north and the south by two seas, the Black Sea and the Sea of Marmara, respectively. The conference venue, the Istanbul Lutfi Kırdar Convention & Exhibition Centre, is located close to Taksim Square which is in the heart of modern Istanbul and easily accessible. The Atatürk International Airport is 24 km away from the city center and is easy to reach from everywhere in the world.

Scientific Program

Over four days, ISPAD 2012 will feature the latest results and insights from diabetes research, continuing successful topics from past years while at the same time putting emphasis on basic research.

Topics

- Insulin resistance and Obesity and treatment modalities
- Monogenic Diabetes
- Special types of diabetes
- National Diabetes Programs
- Chronic complications
- Glycemic Variability
- Technology in Diabetic Care
- Diabetes and organ specific autoimmunity
- Preservation and cure
- Nutrition and diabetes
- Psychosocial issues
- Sports and exercise
